D Details... Lot Sweeping

SERVICES INCLUDE:

- Clean parking lot of all trash and debris
- Cleaning curbs throughout the property
- Clean the top and surrounding area of storm drains
- Blow out main store fronts, entrances, exits and sidewalks around the building

WHY?

Lot sweeping is a practice that promotes cleanliness throughout your property's exterior. Large quantities of debris and sediment can block storm drains and cause flooding. A thorough lot sweep will collect these particles and allow efficient water drainage. When dirt and sand remain on pavement for long periods of time, it quickly starts deteriorating the paving surface. Replacement costs for pavement far exceed the routine expense of sweeping.

Regular sweeping is a very important component contributing to overall outside appearance. Maintaining a clean and professional looking exterior will give a strong first impression to customers and clients. Keeping the exterior clean will also prevent dirt and sand from being tracked inside your building.

WHEN?

We strongly recommend a lot sweep immediately following the winter season to dispose of all remaining sediment and sand. We also recommend scheduling additional services if necessary. Most high traffic parking lots require multiple lot sweeping sessions throughout the year. Other reasons for a scheduled sweep include construction and storm damage.
